

A large, blue and white Vulcan rocket is shown in the process of launching. The rocket is oriented vertically, with its nose pointing upwards. A massive plume of white smoke and fire is being emitted from the base of the rocket, creating a large, bright cloud. The rocket is surrounded by various launch pad structures, including a tall, dark tower on the right side. The background is a dark, clear sky. The overall scene is dynamic and powerful, capturing the moment of liftoff.

THE VULCAN ERA IS HERE!

Vulcan is ULA's newest rocket!

How does ULA's Vulcan rocket harness fire to create thrust and leave the Earth's atmosphere? The answer is rocket science!

Discuss the complexity of fire, thrust and rocket science in your classroom and use that knowledge to create a drawing, painting or other artwork of the Vulcan rocket lifting off. Photos for inspiration can be found [here](#).
